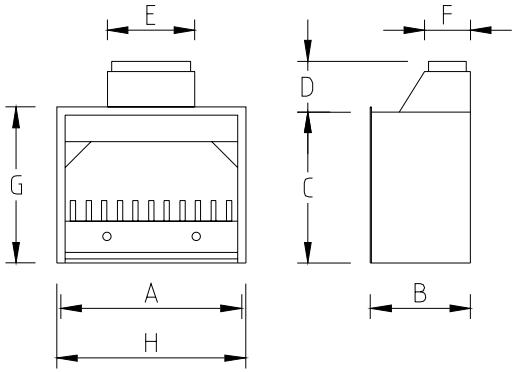
Built-in Fireplace Range

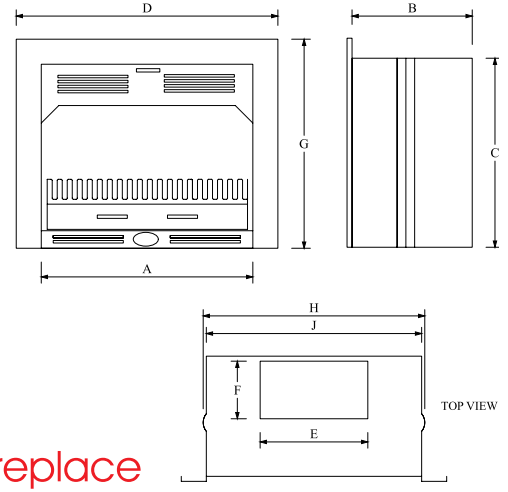
For many people, an open fireplace is the cosiest way to keep warm. A built-in fireplace fitted with a surround and mantelpiece is a beautiful feature in any home. These units are effective and economical fuel users and produce heat by way of convection and radiation. There is something magical about the atmosphere that an open fire creates and it will really turn your house into a home. These fireplaces are easy to operate and to clean. Units with ash pits that can be cleaned from the outside are available on request.



Single Sided Deep Built-in Fireplace

The deep version comes in models 700, 850 and 1050. These are normally installed into a medium to larger area, like living rooms, lounges and family rooms.

Single Sided									Heating Volume m^3
MODEL	A	B	C	D	E	F	G	H	WOOD ANTHRACITE
700 D	740	475	755	230	335	235	770	795	120
850	890	475	755	230	435	235	770	945	140
1050	1090	475	755	230	435	235	770	1145	160



New Shape 850 Built-in Fireplace

This version features an improved convection system with the trim plate available in Black mild steel as well as in Stainless Steel. The trim plate is detachable for easier installation and the unit has a flat top for easier insertion into existing cavities.
