

The Universal Gas Grate Range

Upgrade Your Fireplace to Effortless Comfort with the Universal Gas Grate

The Universal Gas Grate is the perfect solution for transforming your existing wood-burning fireplace into a tidy and convenient gas fireplace while maintaining the classic look and feel of a traditional fireplace.

Avoid major renovations, **the Universal Grate is designed to fit seamlessly into most standard fireplace openings.**

Different finishing options available for this fireplace:

- **Decorative Stones:** Standard stone options include Black Ceramic Ash with Black Ceramic Coals in the burner, and a White Stone surround. Fire Glass in various colours are also available as an alternative.
- **Size:** Available in 4 different sizes, with different heat outputs.
(VFG600: 7.6 kWh) & (VFG700: 8.7 kWh) & (VFG800: 8.7 kWh) & (VFG1000: 11.4kWh)

Key features of the Universal Gas Grate:

- Retrofit into an existing fireplace, or build your housing design.
- The **minimum room size (without permanent ventilation)** should not be less than the prescribed m3.
- Conservative Gas Consumption
- Made of **high-quality black-painted Mild Steel.**
- Safety Guaranteed with ODS Safety System
- **2-Year quality guarantee.**
- Low maintenance and easy to use.
- Requires a registered gas installer for installation.
- Ignites with a Piezo Spark.
- Manufactured in a world-class factory with **ISO9001** certification.

Installation Instructions

The Universal Grate Fireplace is designed to retrofit into an existing traditional single-sided wood-burning fireplace. There is ample room for your gas installer to lead the gas pipe in from behind the fireplace.

The Universal Gas Grate Range

The Universal Grate is a Flueless Fireplace, & therefore any existing chimney will need to be closed off to keep the heat inside the home.

What's in the box?

- Fireplace Grate
- Burner
- Decorative Stones
- Instruction Manual

Note:

- Rooms smaller than the 'Min. Room size' requires suitable permanent ventilation.
- 'Max. Room sizes' are recommended and may vary according to factors such as home insulation, materials, climate, and so forth.
